This product has not been evaluated by the FDA and is not intended to treat, cure, or diagnose any disease.

## Advantages

- Study analysis in the Journal of Pain Research confirms that topical use of certain cannabinoids can reduce pain.
- Using ingestible products along with salves ensure your body is getting enough Cannabinoids circulating throughout the bloodstream to assist the body in it's recovery process...

across skin cell membranes. When CBD interacts with natural receptors in the body, it makes it function more efficiently.

- Salves work much quicker than oils because they are directly applied to the specific area of the body where the problem is. It doesn't have to travel through the digestive system or go through the multiple stages of metabolism. Therefore topical application is effective and gentle with no side effects.
- According to a study done at the Hebrew University of Jerusalem, CBD has many beneficial properties such as analgesic, anti-spasmodic, anti-inflammatory, cell-regenerative, and anti-bacterial.

## How does our BHealth Total Relief Salve work?

- A salve is basically a medical ointment with natural extracts believed to relieve inflammation and alleviate discomfort when applied to the affected skin.
- When you apply a CBD salve on your skin, the cannabinoid in the oil penetrates

## Endocannabinoid System (ECS)

The human **Endocannabinoid System (ECS)** - named for the plant that led to its discovery - is one of the most important physiologic systems involved in establishing and maintaining human health. Endocannabinoids and their receptors (CB1 and CB2) exert a potent **anti-inflammatory and antioxidant effect** <sup>(1)</sup> and are found throughout our entire body: in the brain, organs (skin), connective tissues, glands, and immune cells. are found **throughout our entire body:** in the brain, organs (skin), connective tissues, glands, and immune cells.

They control some of our **most vital life functions**, including our **immune system, memory, appetite, sleep patterns, mood and pain sensation.** <sup>(2)</sup>
