CBD tincture

Broad Spectrum CBD

The most convenient way to get your daily dose of cannabinoids

Tinctures are generally regarded as the most effective and the simplest way to use CBD. Our BHealth CBD tincture is also one of the most convenient ways to consistently get your daily dose of cannabinoids. It can easily be added to your favorite beverages, teas, and smoothies, or simply taken orally.

Broad Spectrum CBD can deliver the enhanced benefits of the "Entourage Effect" without the risk of psychoactive effects of THC as it contains 0% THC.

Advantages

Simplicity

No preparation is necessary when using CBD tincture. Simply open the bottle and drop the BHealth CBD tincture directly under your tongue.

Convenience

It is easy to bring your CBD tincture along with you throughout your day so your CBD extract is never out of reach.

Effortless Dosing

Convenient 30ml dropper bottles that are very easy to carry with you wherever you go.

Easily Absorbed

Tinctures are easier to digest and absorb than capsules or tablets even for those with digestive disorders.

Fun Flavor

Our BHealth CBD Tinctures come in a delicious and natural Tangerine flavor.

Long Shelf Life

Herbs, when tinctured, are very stable. Our MCT-based CBD tincture has a shelf life of up to one year.

Available in Different Strengths

BHealth CBD tinctures come in different strengths for affordable options.

Alcohol-Free MCT Extraction

At our laboratory, a newer extraction method uses medium-chain triglycerides (MCT) from refined coconut oil instead of alcohol as the extracting agent. With MCT-based tinctures it is no longer necessary to ingest alcohol in order to obtain the benefits of a medicinal herb. This method of extraction makes our CBD tinctures widely available to many more people who might otherwise not be able to take advantage of them, such as children, recovering alcoholics, diabetics, religious adherents, and others.

MCT is completely flavorless and has a pleasant, smooth texture so it blends seamlessly into any food or beverage you wish to add it to without altering taste or consistency.

Endocannabinoid System (ECS)

The human **Endocannabinoid System (ECS)** - named for the plant that led to its discovery - is one of the most important physiologic systems involved in establishing and maintaining human health. Endocannabinoids and their receptors (CB1 and CB2) exert a potent **anti-inflammatory and antioxidant effect** ⁽¹⁾ and are found throughout our entire body: in the brain, organs (skin), connective tissues, glands, and immune cells. are found **throughout our entire body:** in the brain, organs (skin), connective tissues, glands, and immune cells.

They control some of our **most vital life functions**, including our **immune system, memory, appetite, sleep patterns, mood and pain sensation.** ⁽²⁾
