CBD serum

The future of healthy skincare today!

Broad Spectrum CBD

The Cosmetic industry is starting to take notice of CBD's anti-inflammatory, antioxidant and regenerative properties.

CBD can help the skin look more radiant and younger by slowing down the visible signs of aging. It can make your skin feel smoother, softer and fuller.

Our **BHealth CBD Body Serum** is a beautifully rich and moisturizing face serum without any greasiness.

It is also an amazing nightly moisture treatment.

Cannabinoid receptors (CB1 and CB2) are expressed throughout human skin. The powerful anti-inflammatory and anti-oxidative benefits of CBD helps to explain the amazing results people are seeing.

Studies are now starting to catch up to the amazing skincare results people have been experiencing when using our CBD skincare (acne ⁽¹⁾, psoriasis ⁽²⁾)

Advantages

- All of our BHealth Broad Spectrum CBD skin care products are made with a variety of all-natural cannabinoids
- Contains no pesticides, toxins or harmful chemicals.
- Marula Oil permits this luxurious serum to absorb quickly and give your skin a radiant glow.
- Olive Squalane (also known as 'mother nature's face lift') softens skin, improves elasticity and helps skin maintain moisture.
- Buriti Oil, with its high level of beta-carotene, helps fight sun damage, seal in moisture and plump skin.
- CBD oil gives the product anti-wrinkle, anti-inflammatory and antioxidant powers.
- Rosehip and Vitamin E help improve skin tone and fight environmental damage.
- Choice Sandalwood and Rose essential oils, both of which have anti-wrinkle properties, help keep skin looking young while providing a relaxing scent.

Endocannabinoid System (ECS)

The human **Endocannabinoid System (ECS)** - named for the plant that led to its discovery - is one of the most important physiologic systems involved in establishing and maintaining human health. Endocannabinoids and their receptors (CB1 and CB2) exert a potent **anti-inflammatory and antioxidant effect** ⁽³⁾ and are found throughout our entire body: in the brain, organs (skin), connective tissues, glands, and immune cells. are found **throughout our entire body:** in the brain, organs (skin), connective tissues, glands, and immune cells.

They control some of our **most vital life functions**, including our **immune system, memory, appetite, sleep patterns, mood and pain sensation.** ⁽⁴⁾
